Education

- CMR COLLEGE OF ENGINEERING AND TECHNOLOGY** Hyderabad, India
Bachelor Of Technology, CSE(AI&ML); GPA: 8.65
2023 – Present
Courses: Data Structures, Operating Systems, Artificial Intelligence, Machine Learning, DBMS, OOPs
- SRI CHAITANYA JUNIOR COLLEGE** Hyderabad, India
Intermediate; Percentage: 95.5
July 2021 – June 2023
- LITTLE GENIUS HIGH SCHOOL** Korutla, India
State Board; GPA: 10
April 2021

Skills Summary

- Languages:** Java, C
- Frameworks:** Node.js, Express.js, HTML, CSS, JavaScript (ES6+), EJS
- Tools:** Git, Postman, VS Code, GitHub, Make
- Databases:** MongoDB, Firebase Firestore, SQL
- Data Science:** NumPy, Pandas, Matplotlib, Scikit-learn
- Machine Learning:** Classification and Regression Algorithms

Work Experience

- Evangelion Solutions** Hyderabad, India
Backend Developer Intern
Jan 2026 – March 2026
 - Developed backend for a real-time social interaction app featuring Caller-Host user roles.
 - Implemented Cloud Function APIs for call initiation, switching, and termination.
 - Managed real-time Firestore updates for call states, user availability, and session tracking.
- SyntecxHub** Hyderabad, India
Backend Intern Trainee
Dec 2025 – Jan 2026
 - Designed and implemented a backend automation system using scheduled cron jobs.
 - Built tasks for stale user deletion, session cleanup, log archiving, and daily summaries.
 - Implemented health-check services to monitor server and database connectivity.

Projects

- AI School Analytics Platform:** Python, Scikit-learn, XGBoost, Node.js, MongoDB, Twilio
 - Built 3-engine ML platform (Random Forest + XGBoost) on live school data for churn prediction and forecasting.
 - Reduced manual follow-up by 80% via Twilio WhatsApp automation triggered by real-time risk classification.
 - Cut at-risk student identification time by 10x using automated 3-tier classification with intervention plans.
 - Engineered 5+ feature pipelines across attendance, fees, marks, and discipline data from a real institution.
- Zuggled Dating Application:** Node.js, Express.js, Firebase Firestore
 - Built backend for a paid social app with 2 roles (Caller/Host); automated revenue split between platform and host.
 - Developed 5+ APIs for call initiation, switching, termination, and coin-based billing with share calculation.
 - Managed real-time Firestore sync across 3 states: call activity, user availability, and role-based access.
 - Reduced billing errors to near 0 by implementing server-side coin deduction and session validation logic.
- Automated Email Referral & HR Reply Tracker:** Make, Gmail, Google Sheets, Telegram Bot
 - Automated bulk referral emails to 100+ HRs using input details (name, role, company) with Resume and LOR attached.
 - Built HR reply tracker monitoring Gmail across 500+ contacts, filtering bots and alerting via Telegram instantly.
 - Reduced manual email effort by 95% with a 4-stage pipeline: Webhook → Processing → Retrieval → Dispatch.
 - Achieved zero infrastructure cost by building entirely on Make, Gmail, and Google Sheets free tiers.

Coding Profiles

LeetCode: kothavivek55

GeeksforGeeks: kothavivek55

Certifications

- Backend Development (SyntecxHub)
- Javascript Essentials (Cisco Networking Academy)
- HEXART (Certification of AI Course)
