

EVANGELION SOLUTIONS

LETTER OF RECOMMENDATION

06/03/2026

TO WHOMSOEVER IT MAY CONCERN

I am pleased to recommend **Mr. Kotha Vivek**, who completed his internship with **Evangelion Solutions Private Limited** as a **Backend Developer Intern** in the Application and Cloud team from **19 January 2026** to **04 March 2026**.

During his time with us, Vivek quickly demonstrated strong analytical ability, technical curiosity, and the discipline required to work in a real-world development environment. He contributed to backend development tasks involving web and application systems, where he showed a solid understanding of backend logic, structured problem-solving, and efficient implementation practices.

What stood out most about Vivek was his willingness to learn and his ability to adapt quickly to new challenges. He consistently approached problems thoughtfully, asked the right questions, and worked collaboratively with the team to deliver reliable solutions. His ability to grasp concepts quickly and translate them into practical implementations made him a valuable contributor during the course of his internship. Beyond his technical skills, Vivek conducted himself with professionalism and accountability. He demonstrated reliability in meeting deadlines, maintained clear communication within the team, and showed a strong sense of ownership over the tasks assigned to him.

Based on my experience working with him, I am confident that Vivek has the potential to grow into a capable software engineer. I strongly recommend him for opportunities in Website Development and Software Engineering roles. I believe he will be a valuable asset to any organization that values curiosity, discipline, and continuous learning.

Please feel free to contact me should you require any further information.

Sincerely,

Panem Chaitanya Pavan Kumar
